

# NEW Easy Wrap AQUA BALLOON™

## FEATURES

- 175mm Easy Wrap Aquas were made to make creating beautiful floral balloon gifts easy!
- The Easy Wrap Aqua has unbeatable clarity and is perfectly round when inflated

Description	Min Inflation Size	Max Inflation Size	Inflation Method	Caution Nates
175mm Easy Wrap Aqua	220mm	330mm	Hand pump	A slow and steady inflation speed is recommended

## HOW TO USE

1. Loosely cover your floral arrangement with paper

2. Insert your floral arrangement to the Aqua via the large neck

3. Once your arrangement is in place, remove the paper and heat seal the large neck

4. Cut to top of the small neck off and inflate to your desired size. Remove the outer film as the balloon inflates

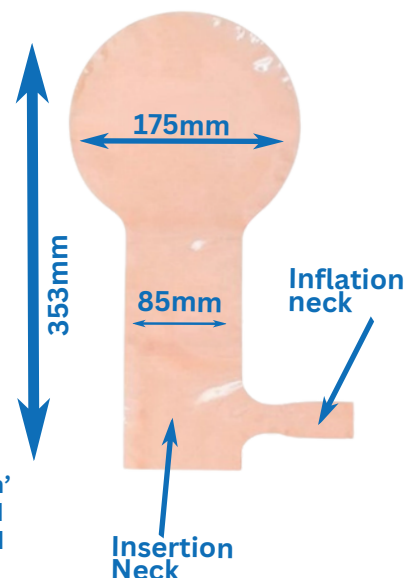

5. Heat seal the small neck

6. Wrap the stems of your floral arrangement in ribbon to create the perfect bubble shape

7. Wrap out your design ready for your customers

## TIPS ON HOW TO INFLATE

- Aqua balloons are designed to be perfectly round and the seam should always be through the centre of the balloon. If at any time during the inflation process you can see 'distortion' i.e the left side is bigger than the right, inflate your Aqua to the maximum size possible and the deflate to your size. This should correct the distortion and create a perfectly clear, and perfectly round balloon.
- If at any time your Aqua becomes cloudy, this means you have over inflated your balloon. This can be corrected by deflating your balloon to the maximum size it should be inflated to
