

Cylinder Information

Balloon gas (generally non-pure helium) is a safe, non-flammable, non-poisonous gas that's lighter than air. It can be used safely either indoors or outdoors. NEVER INHALE balloon gas – although not poisonous, it may cause asphyxiation in higher concentrations.

If you are looking to use or sell helium-filled balloons, you will need to work with a gas supplier to arrange for a regular helium supply. Helium prices will vary dependent upon the size and type of cylinder selected, as well as local delivery and rental pricing arrangements. The cylinder type you choose may also determine the type of inflation equipment you need – please discuss this with your helium supplier or Qualatex® representative.

Cylinders of balloon gas come in different sizes, so the number of balloons you can fill depends on the size of the cylinder chosen. Use the information on this and the following pages to determine the size of cylinder that might best suit your needs.

UK CUSTOMERS ONLY

We have a special price structure agreement with BOC for Qualatex customers.

For information on opening an account with BOC Gases, call Customer Service on 0800 28 12 15 (UK customers only).

BOC GASES

Volume (m ³)	9.00	8.56	3.60	1.81
Weight (Kg)	76.5	46	29.5	16.0
Height (mm)	1510	1180	970	910
Diameter (mm)	230	230	230	140
Pressure (bar)	200	300	200	200
Cylinder size code	L	E33	T	V

Approximate number of Qualatex balloons that can be filled by each cylinder.

Charts show the average number of balloons that can be expected from each size cylinder when the balloons are correctly inflated to the sizes shown.

Latex & Cloudbuster™ Balloon Helium Chart

All 11" Pearl and Metallic balloons are produced on super-sized forms; while the uninflated balloons look larger than other balloons of the same size, they are designed to inflate to the same size as Standard, Jewel, and Fashion Colours. **NOTE:** The listed average inflation sizes, flying times, and numbers of balloons per helium tank are conservative averages.

Actual flying times vary depending on temperature and atmospheric conditions.

All Qualatex® latex balloons are helium-weight quality and are manufactured in the USA or Canada from biodegradable, pure, natural latex.

* **The use of ULTRA HI-FLOAT balloon flight extender is recommended for all helium-filled latex balloons. ULTRA HI-FLOAT can increase the flying times of latex balloons up to 25 times longer than untreated balloons. For more information about ULTRA HI-FLOAT, visit www.hi-float.com.**

** Because the filling and usage of display balloons is beyond our control, no performance or longevity guarantee can be made.

Inflating Cloudbusters with 60/40 helium and air will reduce the amount of helium needed. See pages 198-199 for Conwin 60/40 regulator.

Hi-Float Accessories

Treat your latex balloons and your bottom line!

With ULTRA HI-FLOAT™ balloon flight extender, you can increase the float time of helium-filled Qualatex latex balloons by up to 25 times! That means added value and increased satisfaction for your customers that will differentiate you from your competitors and result in repeat business!

Qualatex Balloon Size	Average Flying Time Helium Only	Average Flying Time with ULTRA HI-FLOAT*
11"	18-24 hours	1-4 weeks
16"	30+ hours	3-7 weeks

How many balloons will it treat?

Balloon Size	Ultra Hi-Float 96oz	Ultra Hi-Float 24oz
11"	567	141
16"	216	54

ULTRA HI-FLOAT is a trademark of the HI-FLOAT Co., in Louisville, KY, USA. *Estimates for typical indoor conditions. Flying time will be less outdoors and varies greatly depending on humidity, temperature, altitude, etc. Balloons typically float half as long in summer as in winter.

ULTRA HI-FLOAT

DAV #55293 148ml (5 oz.)

Includes pump

DAS #84932 473ml (16 oz.)

Includes pump

DAU #80229 710ml (24 oz.)

ZVH #80230 2.84L (96 oz.)

DAX #80295 HI-FLOAT Dispenser

ULTRA HI-FLOAT is an aqueous solution containing a special water-soluble plastic. It dries inside the latex balloon to form a barrier coating that helps hold in helium.

Microfoil Balloon Helium Chart

NOTE: The listed average inflation sizes and numbers of balloons per helium tank are conservative averages. A properly inflated, helium-filled Microfoil balloon will float for at least 3-5 days and can be easily refreshed.

Actual flying times vary depending on temperature and atmospheric conditions.
